INSTRUCTIONS

U-Ring: Put the U-Ring on under and behind the testicles and include the penis. Your device comes with 5 U-Rings in various sizes, choose the size that is a snug fit but not so tight that it feels or becomes uncomfortable. If you need a larger size U-Ring than the selection in your kit, we have them available on our website for purchase.

Base 1 and Base 2: Insert the Base 1 with the guide pins facing out away from the body. Insert the pins into the holes of the U-Ring. Slide the Base 2 onto the guide pins and you have now created a solid ring. Make sure to push the penis down while attaching the Bases.

Locking Pin: Insert the Locking Pin through the center hole of the Base 1 and Base 2.

Spacers: Slide the Spacer on the middle Locking Pin. The spacers are designed to fit their corresponding locking pin size. This is what determines the gap between the back of the Cage and the front of the U-Ring. See (7)

Lube: Lubricate the head and shaft of the penis with a silicone lube. Slide the Cage portion of the device on a flaccid penis.

Cage: Insert the lubed penis into the Cage. Push the penis down into the Cage tip and then slide the Cage onto the corresponding Locking Pins.

Padlock: After assembling the CB-X device, attach the brass padlock thru the small hole at the end of the center pin.

Cleaning: Use a sex toy cleaner or mild soap with a cloth or soft brush to clean. DO NOT use chemicals on your CB-X device. **Not dishwasher safe.**

*Make sure to take the time to smooth any loose skin around the Rings and cage for the most comfortable fit.

FREQUENTLY ASKED QUESTIONS

What happens if we lose the key?

If there is an emergency and need to have the device removed quickly, twist the padlock firmly and it will break the locking pin and you will be able to remove the device. We do sell replacement parts on our website.

Will I be able to go through airport security while wearing the device?

All CB-X products are safe for travel and permitted through airport security.

Although wearing the brass padlock will set off metal detectors. In each CB-X kit, we include 5 black Individually numbered plastic locks which will not set off any metal detectors and will be safe for TSA clearance.

What happens if I get an erection while locked up?

The cage doesn't prevent an erection as an erection is caused by blood flow. Restricting blood flow in any way is never a good idea. The erection will fill the cage and ultimately the cage will control the development of an erection.

INSTRUCCIONES

Lubrique el glande y cuerpo del pene mediante lubricante de silicona Premium. Aplique el producto en estado de relajación.

AROS: Coja la parte inferior del aro y colóquelo alrededor de los testículos y pene. Inserte la parte superior con los pernos guía. Cuando esté colocando la otra mitad, asegúrese de que está empujando el pene hacia abajo mientras une las dos piezas.

PERNOS DE CIERRE: Introduzca el perno de cierre en el costado hundido de los aros.

SEPARADORES: Los separadores están diseñados de tal modo que cada separador encaja con un perno de cierre concreto.

JAULA: Introduzca el pene en la jaula. Empuje el pene hacia abajo para evitar que se pellizque cuando una la jaula al aro.

CANDADO: Después de unir el aro, los pernos guía, el perno de cierre y los separadores a la caja, añada el candado de latón. ¡Asegúrese de que tiene un buen llavero!

PRODUCTOS DE LIMPIEZA: Use a limpiador de juguetes Premium y un cepillo suave para limpiar. No utilice productos de limpieza doméstica.

NOTA: Dedique tiempo siempre a alisar toda la piel suelta que quede alrededor de los aros y jaula para sentirse más cómodo.
