A. Power on & off button / Pause button

1. Hold for 2 seconds to power on or off, it will be on piston mode level 1.
2. With power on, tap to pause all functions. Press again to resume previous mode. If it is paused a half an hour, the product will shut down automatically.

B. Thrust increase button

1. With power on, tap to switch upward the 11 frequencies of thrusting (frequency 0-10). It doesn't rotate.

C. Thrusts decrease button. With power on, tap to switch downward 11 frequencies of thrusting (frequency 0-10). It doesn't rotate. In level zero, piston action will stop.

D. Airbag control button

1. Switch the button to the end in “—” direction, the airbag control is in zero.
2. Switch the button in “+” direction(not to the end), select varying airbag levels by hand. Switch this button and then loosen, the suction become tighter... Repeat this action to change suction you want.
3. Switch it to the end in “+” direction, is quick access controlling 10 modes of suction. Switch it and then loosen to switch modes(with remind voice), to switch 10 modes of suction. Please switch the suction mode to zero and re-select modes if you want to get back to the first frequency.

E. Voice volume control button.

To control the volume of the voice, use this scroll wheel.

F. Perfume container

1. Push up to open the container. You can put some drops of perfume on the cotton cushion.
2. During use you can switch the cap on the perfume container open so that scent of the perfume can vaporize into the room.

G. Exchange of the sleeve may only be done with power switched off. Connect power cord into the machine and leave power off. Switch the button in the direction of the arrow and the sleeve will set into take out position. You can easily release sleeve from piston for sleeve exchange or cleaning. After installing the sleeve into the piston, switch "Sleeve in-out button" in semicircle arrow direction to put the sleeve back in starting position.

Reminder: when you want to pre-heat before use, dry the sleeve, or close the cover, please put the sleeve back to the bottom in the start position. (Down in the piston))

H. Moaning button

1. Press to start moaning mode.
2. Press moaning button again to switch between different voices.

I. Indicator lights

1. ABCH Buttons have indicator lights in red. When you change frequencies of thrusting, the indicator light does not flash in level zero, one indicator light flashes in level one, two indicator lights flash in level two four indicator light flash in level four. When you select higher thrusting frequencies, four indicator lights flash regularly in red color.
2. In pre-heating function, the four main buttons will flash.
3. In drying function, all button indicators flash in turn.
4. In the highest thrusting mode, all buttons indicators will flash.
5. When you press the pause button, all buttons flash in red.

J. Moaning mode / Bluetooth mode indicator light

1. In moaning mode, moaning button light flashes in red and go out when turned off.
2. In Bluetooth mode, Bluetooth indicator flashes in blue showing that device is searching the Bluetooth headset nearby. The indicator lights constantly up whilst connection is active.

K. Heating button

1. With power off, sleeve inserted and cover closed, press this button to start or stop the pre-heat function. After half an hour heating, the device will stop pre-heat function automatically.

2. At room temperature, it could heat up to the highest secured temperature of 40°C within 15 minutes. We suggest placing the device upright when in heating mode with the cover faced down.

L. Drying button

With power off, the sleeve inserted and cover closed, press this button to start or stop drying function. After cleaning the sleeve with half warm water and a silk soap, wipe it dry with a towel and press button to start drying function. The drying time will not exceed 1 hour. We suggest placing the device upright in drying mode with the cover faced down.

M. Bluetooth button

1. With power on, hold for 3 seconds to start / stop Bluetooth mode. In Bluetooth mode, the device will search and connect Bluetooth headset nearby automatically. Your Bluetooth headset needs to be turned on and waits for connection at the same time. After connecting successful, user could hear the sexual moaning through the Bluetooth headset.

Reminding: in Bluetooth mode, the built-in loudspeaker & wired headset will be turned off automatically and turned on automatically when Bluetooth mode is off.

2. In Bluetooth mode, volume is only controllable by Bluetooth headset.

Reminding:

This product is protected when blocked. When blocked, indicator lights flashes 5 times with vocal reminder at the same time. When the piston is unblocked, it will resume previous used mode. If the blocking warning continues for ten times in a row, the device will power off automatically.

Power:

This device operates only when connected to 220 V power outlet. Use only with power adaptor cable as supplied. The product is not rechargeable! This device comes with AC 220 Volts EU connecting plug.

Specifications

Item Name Future Sexual Masturbator (PRO Version)

Item Number 090077

Executive Standard Q/LTDZKJ 1-2019

Dimension 126*100*271.5mm

Power Adapter AC 100~240V

Rated Current ≤5A

Material ABS、TPU、PC、TPE

Rated Voltage 12V

Maximum Noise ≤80db

Packaging content: Masturbator, warranty card, operation manual, power adapter, perfume, two sleeves, storage bag.

Getting started

- 1 Read this manual carefully
